Basic Information

- Place of Origin: Foshan, China
- Brand Name: Realsun Deco
- Minimum Order Quantity: 3000m
- Price: Negotiable
- Packaging Details: Pack in roll
- Delivery Time: 15-20 days
- Payment Terms: T/T 30% down payment, 70% balance before shipment
- Supply Ability: 500000m/month

Product Specification

- Feature: Non-toxic/ Anti-Flame/ Moisture-proof
- Packing: Pack In Roll
- Usage: Lamination, Wrapping Machine, Vacuum Membrane Press
- Thickness: 0.10mm-0.50mm
- Material: PVC
- Width: 1260mm, 1400mm
- Surface: Glossy/ Matt/ Embossed/ Super Matt/ Soft Touch
- Application: Furniture/ Cabinet/ Door/ Wall/ Ceiling/ Floor
- Highlight: **pvc thin film 0.10mm, 0.50mm pvc thin film, 0.10mm decorative pvc foil**

Product Description

Pack In Roll Vinyl Decorative Film - Thickness starting from 0.10mm to 0.50mm

Product Description:

All About PVC Foil

Our PVC foil is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its durability, flexibility, and ease of processing. PVC foil is available in a wide range of colors, patterns, and textures, making it capable of mimicking the aesthetic of natural materials such as wood, stone, fabric, or metal. Not only can PVC foil adhere to a variety of surfaces, but it is also incredibly durable, making it a great choice for high-traffic locations. Additionally, it requires very little maintenance, making upkeep easy. PVC foil is also significantly more cost-effective than natural materials, making it possible to create upscale aesthetics without the expense. Manufacturers offer a wide range of styles and finishes, enabling modification for project specifications and personal design preferences. PVC foil is commonly used in residential and commercial settings for applications such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, and retail displays.

Technical Parameters:

When it comes to thickness, our range is from 0.1mm to 0.5mm. The width of our products can reach 1260mm or 1400mm. Length of each roll is from 100 to 400 meters. What's more, we have a variety of designs such as wood grain, solid color, marble, brick, and so on. In terms of surface treatment, we can offer matt, super matt, embossed, high gloss, and soft touch. Finally, we provide OEM and ODM services.

Applications:

Different Process Method for Different Application

1. Membrane Press(vacuum press): This process is ideally suited for the application of thicknesses of 0.20-0.50mm and widths between 1260-1400mm, with lengths of 100-300m/roll. This method covers MDF, particleboard, wooden boards, fibreboard, and various other surfaces for application with doors, kitchen cabinets, wardrobes and furniture. This process covers the embossed board and allows for the coverage of up to five of its surfaces at the same time.
2. Wrapping Profiles: This process is best suited for thicknesses of 0.12-0.18mm, with widths of 40-1260mm, and lengths of 300-800m/roll. This method is can be used to cover all kinds of profiles including wooden, aluminum and PVC profile, as well as door frames, window sills, base channels and PVC ceilings.
3. Cold Laminating: This process can cover thicknesses of 0.12-0.20mm, with widths between 1240-1260mm, and lengths of 300-500m/roll. This makes this type of lamination ideal for flat panels, such as wood panels, steel panels, aluminum panels and PVC panels, for use as doors and in furniture applications.
4. Hot Laminating: The properties of hot lamination make it particularly well suited for thicknesses of 0.16-0.30mm, with widths of 1260mm and lengths of 200-300m/roll. This method best applied to PVC and aluminum panels, and can be used to create doors and skirting.
5. Self-adhesive: Self-adhesive options offer a viable solution, as they are designed for thicknesses of 0.10-0.20mm, available in widths of 600mm/ 1220mm and lengths of 5-50m/roll. This method can be applied to any smooth surface for furniture and indoor decorations.

Customization:

Customized PVC Decorative Film Service

Realsun Deco offers customized service for PVC Decorative Film. Our product is made of Polyvinyl Chloride Sheet, which is with various design like wood grain, marble, brick, stone and so on. The product is of high quality and with reasonable price. The details of our product is as follow:

Brand Name: Realsun Deco

Place of Origin: Foshan, China

Minimum Order Quantity: 3000m

Price: Negotiable

Packaging Details: Pack in roll

Delivery Time: 15-20 days

Payment Terms: T/T 30% down payment, 70% balance before shipment

Supply Ability: 500000m/month

Width: 1260mm, 1400mm

Length: 100m-400m

Material: PVC

Design: Wood Grain, Marble, Brick, Stone And So On

Thickness: 0.10mm-0.50mm

If you are interested in our Polyvinyl Chloride Sheet, PVC Decorative Sheet or PVC Decorative Film, please don't hesitate to contact us. We look forward to cooperating with you.
