Product Description

Embossed PVC Lamination Film Suitable for Wardrobe MDF Covering

Product Description:

Polyvinyl Chloride (PVC)

Our primary ingredient is Polyvinyl Chloride (PVC), a synthetic plastic that has great tensile strength, flexibility and ease of processing. This makes the PVC foils extremely durable and reliable in many interior applications.

Appearance

We offer various colors, patterns, and textures of PVC foils that bring an elegant, and premium look to your home or office space, just like stone, metal, and wood, but without the prohibitive cost.

Adaptability

The PVC foils can be applied to many different kinds of surfaces that need decoration, such as walls, doors, cabinet, and furniture. This allows us to customize a space regardless of its size and shape.

Durability

Our foils are known for their durability and resilience to degradation, making them perfect for high-traffic areas. On top of that, it doesn't require complicated maintenance, needing just a simple weekly cleaning with a damp cloth.

Economical

The PVC foils are a cost-effective choice among the wide range of decorative materials, moreover, with manufacturers offering a wide selection of styles and finishes, it will be easy to modify them to suit your demands.

Applications

Our foils are widely used in both commercial and residential settings, such as walls, furniture surfaces, retail displays, interior doors, and kitchen or bathroom cabinets.

Features:

Product Name: PVC Lamination Film

Thickness: 0.1mm-0.5mm

Material: PVC

Length: 100m-400m/roll

Service: OEM, Customized Design And Size

Design: Wood Grain, Marble, Brick, Stone, Plain Color Etc.

Specialty: Lamination Film, Lamination Roll Film, Lamination Film Roll

Technical Parameters:

We provide our customers with an extensive selection of aluminum composite panel with different thicknesses ranging from 0.1mm to 0.5mm. The product's widths are also available in two sizes, 1260mm and 1400mm. Furthermore, it can be ordered in various lengths up to 400m in a single roll. The panels have a beautiful, diversified design, featuring wood grain, solid color, marble, brick and many more. Additionally, the surface of the panel can be treated with matt, super matt, embossed, high gloss or soft touch.

On top of that, we offer to customize the panels, allowing our customers to benefit from our OEM and ODM services. As a manufacturer of aluminum composite panel, we strive to excellently meet your requirements.

Applications:

Membrane Press (vacuum press) is capable of providing covers on MDF, particleboard, wooden board, fiberboard, etc in thickness starting at 0.20-0.50mm, and widths of 1260mm or 1400mm. The lengths of the roll range from 100-300m/roll, making this type of press suitable for doors, kitchen cabinet, wardrobe, furniture, etc. Also, this type of press is suitable for cover embossed boards, and the capability to cover five surfaces at the same time.

The Wrapping Profiles process is suitable for all kinds of profiles, including wood profile, aluminum profile, PVC profile, etc, in thickness ranging from 0.12-0.18mm with width of 40-1260mm and length of 300-800m/roll. This type of process is suitable for door frames, window sills, base channels and PVC ceilings.

Cold Laminating is suitable for all kinds of flat panels, such as wood panel, steel panel, aluminum panel, PVC panel, etc with thickness of 0.12-0.20mm, width of 1240-1260mm and length of 300-500m/roll. This type of press is suitable for doors and furniture.

Hot Laminating offers the same thickness range, but is suitable for PVC panel, steel panel, aluminum panel with a width of 1260mm and length of 200-300m/roll. This type of press is suitable for doors, skirting and so on.

Finally, the Self-adhesive option offers between 0.10-0.20mm thickness in width of 600mm or 1220mm with lengths of 5-50m/roll. This type of covering can be used on any smooth surface for furniture and indoor decorations.
