- Packing: Pack In Roll
- Highlight: **marble effect pvc decor film, 50m pvc decor film, 50m pvc self adhesive film**

Product Description

Marble Rigid PVC Membrane for Furniture with 0.10mm-0.50mm Thickness

Product Description:

Benefits of PVC Foil from Realsun Deco

The main ingredient of Realsun Deco's PVC Foil is Polyvinyl Chloride (PVC), a synthetic plastic that has superior strength, flexibility, and a simple process to work with. We offer various colors, patterns, and textures that can be used to mimic real materials, such as wood, stone, cloth, and metal. At the same time, they are more affordable and maintain a premium appeal. Our it is highly suitable for all types of surfaces, such as walls, doors, cabinets, and furniture. It is strong and resistant to deterioration and is able to cope with high-traffic areas. After installation, it can easily be cleaned with a wet cloth once a week, making it highly convenient.

The primary advantage that PVC decorative foil offers is its economical cost in comparison to natural materials. However, diverse styles and finishes are also available for modification, making customization to project requirements and design preferences possible. As a result, it finds application in wall paneling, furniture surfaces, retail stores displays, interior doors, kitchen and bathroom cabinets, and even in home and commercial settings.

Features:

Product Name: PVC Decorative Film

MOQ: 3000m/model

Material: PVC

Design: Wood Grain, Marble, Brick, Stone And So On

Usage: Lamination, Wrapping Machine, Vacuum Membrane Press

Features:

Non-toxic

Anti-Flame

Moisture-proof

Widely Used For PVC Door Foil, PVC Membrane For Furniture, PVC Lamination Foil

Technical Parameters:

We offer a wide range of 0.1mm to 0.5mm PVC film for a variety of applications. With a width of 1260 mm and 1400 mm and a length of 100-400 m/roll, you can be sure to find it suitable for your projects. Various designs of wood grain, solid color, marble, brick and more are available. The surface treatments are matt, super matt, embossed, high gloss, and soft touch. Plus, we offer both OEM and ODM service for further customization.

Applications:

Membrane Press (vacuum press): This method is used for covering MDF, particleboard, wooden board, fiberboard, etc. with a thickness of 0.20 to 0.50 mm and width of 1260-1400mm. Highest length of each roll is 300m and is mostly used for making doors, kitchen cabinets, wardrobes and other furniture. This process is also applicable for covering embossed board with cover at all five sides.

Wrapping Profile: This process is applicable for wrapping wood profile, aluminum profile, PVC profile, etc. with a thickness of 0.12-0.18mm and width ranging from 40-1260mm. Length of roll is between 300-800m. It can be used for door frames, window sills, base channels, PVC ceilings, etc.

Cold Lamination: This process is used to cover various flat panels including wood panels, steel panels, aluminum panels, PVC panels, etc. with a thickness of 0.12-0.20mm and 1240-1260mm in width. Maximum length of each roll is 500m and is basically used for doors and furniture.

Hot Laminating: This process is used mainly for covering PVC panels, steel panels, aluminum panels with a thickness of 0.16-0.30 mm and 1260mm in width. Length of each roll is 200-300m and is usually applied for making doors, skirting, etc.

Self-adhesive: It is a process with a thickness of 0.10-0.20mm and width of 600mm-1220mm. Any smooth surface can be covered with it, mainly used for furniture and other indoor decorations. Each roll is 5 to 50m in length.
